## Talha Sultan

### Full Stack Developer

Full-Stack Developer with more than 6 years of Experience in Analyzing, Designing, Developing and Integrating Front-End & Back-End based applications.

## About me

Computer science graduate with a can-do attitude, and experience in working applications and solutions using **Java, Groovy, Grails, Spring Boot, NodeJS, Docker, and AWS**. My competencies are in building scalable backend services. I am always energetic and eager to learn new skills, When I am free, I learn new tools or work with projects that capture my interest.

## Work experience

### Full-stack developer

Since January 2021 Qbtech Stockholm, Sweden
Worked on a Groovy-based system that creates assessment reports on the user and provides objective data to the professionals for ADHD diagnosis and treatment.
- Responsible for technical decision-making and helping the team.
- Played a major role in designing and implementing the Ktor application.
- Refactored and improved the overall quality of the code.
- Managed the infrastructure in AWS.

**Methodologies and Technologies:** Agile, Scrum, Grails, Groovy, MySQL, Junit, Exposed, Ktor, Kotlin, Terraform, ReactJS, AWS, Github

### Full-stack developer

From November 2021 to January 2022 Northbay Solutions Islamabad, Pakistan
Worked in the development of NodeJS based application using serverless framework. My job responsibilities were to create new features, fix bugs and review pull requests.
- Responsible for adding and managing endpoint build with AWS API Gateway and Lambda.
- Implementation and integration of multiple application components in NodeJS.
- Worked on maintenance of old features build using ReactJS.
- Test-driven development using Jest

**Methodologies and Technologies:** Agile, Scrum, AWS Lambda, AWS API Gateway, AWS Cognito, PostgressSQL, Jest, Express.js, Node.js, Jest, Jira, Confluence

### Full-stack developer

From March 2020 to November 2021 NMX Global Software Islamabad, Pakistan
Worked on Java based product that is used to optimize the companies R&D productivity by providing accurate planning, scheduling, and proven methodology for productivity improvement. My job responsibilities were:
- Developed backend using NodeJS, Struts2, Java, Spring, and Hibernate.
- Awarded The Excellence award for outstanding performance, diligence, and continuous hard work.
- Worked closely with the app development team including the product manager, developers, and QA to determine problems and best practices

**Methodologies and Technologies:** Agile, Scrum, Docker, Java, Struts, TypeScript, Nodejs, GraphQL,Sequelize, Jira, PostgreSQL, Oracle, PL/SQL

## Work experience

### Full-stack developer

From November 2016 to March 2020 AizTek Technologies Islamabad, Pakistan

Worked on E-commerce solution that provided the highest quality nutritional and health-related 100% organic botanicals and essential oils that consumers can trust.

Worked on real state solutions to develop online technologies which assist real estate developers throughout the entire property marketing, sales and management cycle, from conception to maturity and beyond.

Worked on a solution for Arranging a funeral or memorial service. Solution main focus was to connect customers with all the professional services they will require in navigating this stressful time.

Worked on a product that facilitate professionals to manage, publish and share images with clients, guests and other event professionals

**Achievements/Tasks:**

- Used Java/J2EE technologies to develop web applications for client-server management and added functionalities to existing applications

- Monitored and provided all the technical support during testing and development of web application
- Front-end development using Ajax, BackboneJS, Jquery, Bootstrap
- Did many integrations like PayPal, Zoom, InfusionSoft etc
- Supervised and led a team of junior software engineers during the development of a robust upgrade version of the company's software applications.

**Methodologies and Technologies:** AWS(API Gateway, SQS, Lambda), Agile, Java, Groovy, Grails, Spring Boot, BackboneJS, JavaScript, React, Bootstrap, HTML, CSS, MySQL, PostgreSQL, RabbitMQ, RESTful API, Trello, Jira, Apache Tomcat, Linux
